Internship

GE HealthCare — EEDP EID · Beijing, China

(Jun 2025 – Present)

- Proposed a dual-path extraction approach for automated knowledge graph construction, replacing conventional chunking to improve structural awareness.
- Built schema-focused and global-awareness processing pipelines for healthcare manuals, enabling higher-quality domain knowledge graphs and improved retrieval/Q&A.

Microsoft China — APRD Intern · Beijing, China

(Apr 2024 – Jul 2024)

- Optimized a GPT-4 RAG assistant by applying prompt engineering and few-shot techniques to increase context-aware responses and retrieval accuracy.
- Integrated multiple OCR models with adaptive selection, deploying Teams-embedded workflows that improved productivity by ~15%.

KPMG Advisory — Management Consulting Intern · Beijing, China

(Sep 2023 – Jan 2024)

- Developed XGBoost-based forecasting models to enhance sales forecasting and support data-driven planning.
- Implemented master data management (MDM) solutions for multi-department data governance and real-time processing, improving operational efficiency.
